The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 102(B) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Davies (U.S. Patent No. 6,224,760). The claims are considered to read on Davies (U.S. Patent No. 6,224,760). Davies (U.S. Patent No. 6,224,760) is considered to inherently have the recited local effective channel height because it has tapered ribs. However, if a difference exists between the claims and Davies (U.S. Patent No. 6,224,760), it would reside in optimizing the elements of Davies (U.S. Patent No. 6,224,760). It would have been obvious to optimize the elements of Davies (U.S. Patent No. 6,224,760) to enhance separation.
